### DETAILED ACTION

1. The Final Rejection is now withdrawn in view of an appeals conference in response to brief filed on April 19, 2007.
2. Rejection under 35 U.S.C. 101 for statutory double patenting is now withdrawn.
3. Claims 1 and 2 are pending in the application.

### NEW GROUNDS OF REJECTION

#### ***Claim Rejections - 35 USC § 112***

4. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, the term ---highly crystalline form ---- is indefinite since its meaning is not clear. According to the specification on page 4, first paragraph, this term is defined as --  
- having a higher crystallinity than any other form of magnesium salt of S-omeprazole disclosed in the prior art ----- . This does not tell anything about the crystallinity of instant trihydrate form since there is no comparative data present as compared to prior art known forms including trihydrate form ( see line 5 on page 4 ). Does the instant trihydrate form has higher crystallinity as compared to the trihydrate form of Pat 6,369,085?

#### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory

Art Unit: 1625

obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1 and 2 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,369,085.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the cited patent directed to trihydrate of magnesium salt of S-omeprazole having specific X-ray diffractogram anticipate the instant claims.
